World Scientific Series in Information Studies - Volume 9

Information Studies and the Quest for Transdisciplinarity

Unity in Diversity

Edited by **Mark Burgin** (*UCLA*) & **Wolfgang Hofkirchner** (*Vienna University of Technology, Austria*)

Key Features:

- The book represents the most recent achievements in information studies related to social problems and the development of society
- The book represents advanced ideas and approaches to utilization of information technology and science for the benefit of separate individuals and society as whole
- The book is written by the leading experts in information theory, computer science and the theory of complexity

Description:

This book is the second volume of a two-volume edition based on the International Society for Information Studies Summit Vienna 2015 on "The Information Society at the Crossroads. Response and Responsibility of the Sciences of Information" (see summit.is4is.org).

The book gives an up-to-date multiaspect exposition of contemporary studies in the field of information and related areas. It presents most recent achievements, ideas and opinions of leading researchers in this domain reflecting their quest for advancing information science and technology. With the goal of building a better society, in which social and technological innovations help make information key to the flourishing of humanity, we dispense with the bleak view of the dark side of information society.

It is aimed at readers that conduct research into any aspect of information, information society and information technology, who develop or implement social or technological applications. It is also for those who have an interest in participating in setting the goals for the sciences of information and the social applications of technological achievements and the scientific results.

Pub Date: Feb 2017

Binding: Hardcover

ISBN: 978-981-3108-99-8

Price: £98

Page Extent: 250pp

Type: Review Volume

Main Subject: Computer Science

Sub-subjects: Artificial Intelligence / Machine Learning; Databases/Information Sciences; Popular Science; Fuzzy Logic; Mathematical Logic And Foundations; Complex Systems

BIC: GPF

BISAC: COM031000; COM004000; COM021000

Keywords: Databases/ Information Sciences; Innovation / Technology / Knowledge / Information Management; Philosophy; Popular Science

Imprint: World Scientific Publishing Company

Readership: Researchers in aspects of information.
